A quiet PC is a personal computer that makes very little, or no noise. Common uses for quiet PCs include video editing, sound mixing and home theater PCs, but noise reduction techniques can also be used to greatly reduce the noise from servers. There is currently no standard definition for a "quiet PC", and the term is generally not used in a business context, but by individuals and the ...

There was a time in the past when every third advertisement you saw on TV was of a detergent bar. Have you wondered where the detergent bar advertisements have disappeared today? The Washing Machine has literally killed the detergent bar manufacturing industry. Choosing the best Washing machine for your home can be a tough job.
